

# PAIDI CHANUKYA

Aspiring Software Development Engineer

Vadodara, India | +91 8309183938 | chanupaidi123@gmail.com

[LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Enthusiastic and self-motivated fresher with a passion for software development and technology. Familiar with Java, HTML, CSS, and programming fundamentals, with experience building small projects. Looking for an opportunity to grow skills and contribute to real-world applications.

## EDUCATION

### Parul University

Bachelor of Technology in Computer Science

07/2023 – 05/2027

GPA: 6.95 | Vadodara, India

### Tirumala Junior College

High School

05/2023

Percentage: 93% | Visakhapatnam, India

## PROJECTS

### BloodPrint AI - FingerPrint-Based Blood Group Prediction Using CNN

*Tools & Technologies: Python, TensorFlow, Keras, Flask, OpenCV, NumPy, Pandas, Scikit-learn, HTML, CSS, JavaScript, Bootstrap, Chart.js*

- Designed and trained a CNN model for multi-class blood group classification (A, B, AB, O) using fingerprint datasets.
- Implemented image preprocessing techniques including resizing, normalization, grayscale conversion, and data augmentation.
- Developed a responsive web application with real-time fingerprint upload and prediction functionality.
- Integrated dynamic visualization using Chart.js to display prediction probabilities and confidence scores.
- Designed responsive frontend UI using Bootstrap, HTML/CSS, and JavaScript.
- Visualized prediction outputs and confidence metrics using Chart.js.

### AI Travel Companion – AI-Powered Smart Travel Planning Platform

*Tools & Technologies: React, TypeScript, Node.js, Express.js, MongoDB, Mongoose, OpenAI API, Google Maps API, OpenWeather API, Tailwind CSS, JWT, Recharts*

- Designed and developed a full-stack AI-powered travel planning platform for generating personalized itineraries, travel recommendations, and destination guidance.
- Integrated AI-powered features including an intelligent chatbot, day-by-day trip planning, packing list generation, visa guidance, and destination tips.
- Developed secure RESTful APIs using Node.js and Express.js with JWT authentication and MongoDB for managing users, trips, expenses, and favorites.
- Implemented trip management and expense tracking with real-time budget monitoring and interactive analytics using Recharts. Google Maps and weather APIs to provide location-based search, nearby attractions, route planning, and destination weather information.

## SKILLS

|                 |                                          |
|-----------------|------------------------------------------|
| Languages       | Javascript, Python, HTML, CSS            |
| Databases       | MongoDB                                  |
| Tools & Core CS | DBMS, Computer Networks, GitHub          |
| Soft Skills     | Communication, Teamwork, Time Management |
